Sales Order Processing >> Shipping >> Billing

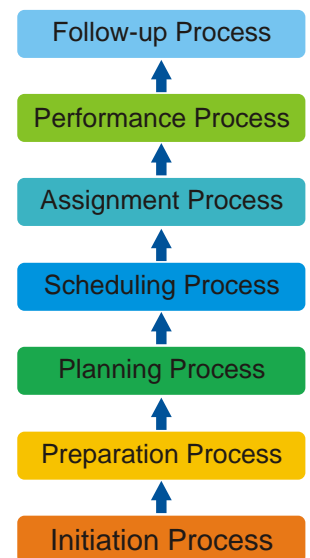

Order Management

Knowing the exact location of your inventory will ensure on-time deliveries and keep your customers happy. Our Distributed Order Management helps deliver seamless order fulfillment across your supply chain.

With Order Management, you can allocate inventory from your warehouse or plan for inventory still in transit or being produced by a supplier. You gain complete order visibility by having a solution that owns all of your order demand.

Using a flexible business workflow configuration, Easy Business Solutions - Order Management adapts to a changing business environment and provides a powerful set of capabilities that can be configured to your particular business requirements.

Key Benefits:

- 1) Distributed Order Management.
- 2) Coordinates the entire order fulfillment cycle.
- 3) Balances supply and demand in real time.
- 4) Offers a dynamic view of customer demand, inventory and supply.
- 5) Provides order capturing and allocation from multiple channels.
- 6) Presents complete order visibility for accurate prediction of delivery dates.
- 7) Access to real-time reports that are automatically generated by the system.

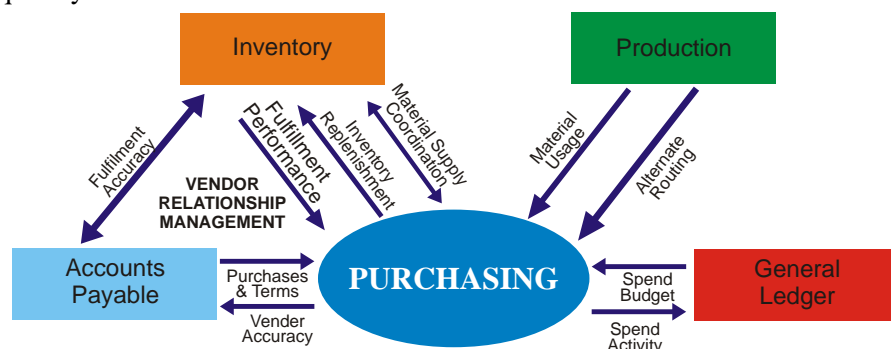

Purchasing

The IBS Easy Business Solutions - Purchasing Module offers system users comprehensive management control of all order processing of assets, from budgeting, purchase order, goods delivery, to invoicing and final disposal. By entering purchase order information directly into Purchasing module, system users can see at a glance what assets are on order, their cost, what has been received and those overdue.

With IBS Easy Business Solutions Purchasing you can streamline your purchase order processing. This Module provides complete purchasing control to generate and track purchase orders from PO issue to receipts. The Purchasing module provides controls for the complete procurement process, from vendor quoting through receiving, inspection, and cost accrual and vendor payment.

Key Benefits:

- 1) asset automatically released into the Core System on delivery
- 2) order information & supplier details can be quickly identified
- 3) fast order processing
- 4) improved budget control
- 5) problem & outstanding orders identified
- 6) significant management time savings
- 7) aids budget forecasting.
- 8) Access to real-time reports that are automatically generated by the system
